

# The Parking Lot Matching Sets Activity

## To prepare:

Copy the following pages on colored cardstock paper as shown. Laminate or place in page protectors as you prefer. Collect enough toy cars (the size of Hot Wheels) for the set. You will need 55 cars to complete one set from 0-10, plus perhaps a few extras to account for a few of them being lost. While it seems to be a large number, when I asked my parents to help, they donated many more than required (approx. 450!), so it really should not be an overwhelming task!

## Directions:

Show the children how to count out the correct amount of cars for each sheet. If you would like to make it self correcting, put the correct amount of stickers on the back of each sheet. Make them CAR stickers, just for fun!
